

# How to make you-tube video

Conducted by : Dr.Dhairya  
shah

## **1.Preparing lectures and slide**

- Plan the content of lectures and preparing slides.
- Structure your presentation content.
- Use key points.
- Do not repeat the same points or content.
- Prepare lecture informative of students.

## **2.Download the lectures capture software or apps**

## **3.Optimize audio and video quality**

- Record video in quiet,well-lightened room or office
- Position webcam in such a way that it records your head and shoulder and sit about eye level.
- The room should be quiet and well lightened for getting good audio and video from native microphone and camera in PC.
- **Things to watch out for when recording outside the classroom:**
  - a. backlighting
  - b. Lowlighting
  - c. Loud fan and backround noice
  - d. Visible unwanted things behind you
  - e. Or any other disturbance
- **Additional equipments for optimising quality:**
  - a. External microphones
  - b. Additional lighting

#### **4.Record a test video for following things:**

- To check for any disturbances either with audio or video
- To check for quality of the video

#### **5.Record and edit with lecture capture software or app**

#### **6.Lastly Share your video:**

- To your LMS(learning management system)
- Or share the link of the video
