

BIOSTATISTICS : REPORT

Department of Oral & Maxillofacial Surgery organized workshop on dentistry beyond teeth & occlusion on 2nd and 3rd January 2025, 2:00 pm onwards in Lecture Hall 1, AMC dental college. Workshop on biostatistics offered an invaluable opportunity to dive into the essential tools and methods used in analyzing data within the health and life sciences fields. Participants gained hands-on experience with statistical techniques such as hypothesis testing, organizing data and all crucial for interpreting research findings. Speaker of the event, Dr. Hemant Tiwari provided a clear understanding of how biostatistics informs decisions in public health, medicine, and clinical research, equipping attendees with the skills to handle complex data and draw meaningful conclusions to drive evidence-based practices.
