

A Photography Workshop: Report

The event aimed to equip dental professionals with the skills and knowledge necessary to capture high-quality images for documentation, communication, and education.

Objectives

- To understand the fundamentals of photography in dentistry
- To learn techniques for capturing high-quality images of dental procedures and cases
- To discuss the importance of photography in dental documentation and communication
- To provide hands-on experience with dental photography equipment

Program Outline

1. *Lecture Session*: "Introduction to Dental Photography"

- Overview of photography principles and techniques
- Discussion of dental photography equipment and software

2. *Hands-on Session*: "Dental Photography Techniques"

- Participants practiced capturing images of dental models and simulations
- Instructors provided guidance on lighting, composition, and camera settings
- Instructors provided feedback and guidance on improving image quality

Participants

The workshop attracted many participants, including dental students, residents, and practicing dentists.

Evaluation and Feedback

Participants evaluated the workshop highly, as "excellent". Feedback highlighted the hands-on sessions as particularly valuable.

Conclusion

The photography workshop was a success, providing participants with practical skills and knowledge to enhance their dental photography capabilities. We plan to offer similar workshops in the future to continue supporting the educational needs of dental professionals.
